

TT-60™ HORIZONTAL CARTONER

Compact Automatic Horizontal Cartoner Suitable for Multi-Packing Applications.

The TT-60 side load cartoner features stainless steel frames, powered carton magazines, rotary carton erectors, fixed size or adjustable conveyors, and PLC controls with self-diagnostics. A wide assortment of options includes embossers, imprinters, leaflet placers, and servo-controlled product handling devices. The TT-60 Horizontal Cartoning Machine can collate products, and load them into a carton, or a display pack at speeds up to 100 CPM. Applications include pouches, blister packs, carded items, and numerous others.
