

TT-912™

TRI-SEAL GLUE/TUCK CARTONER

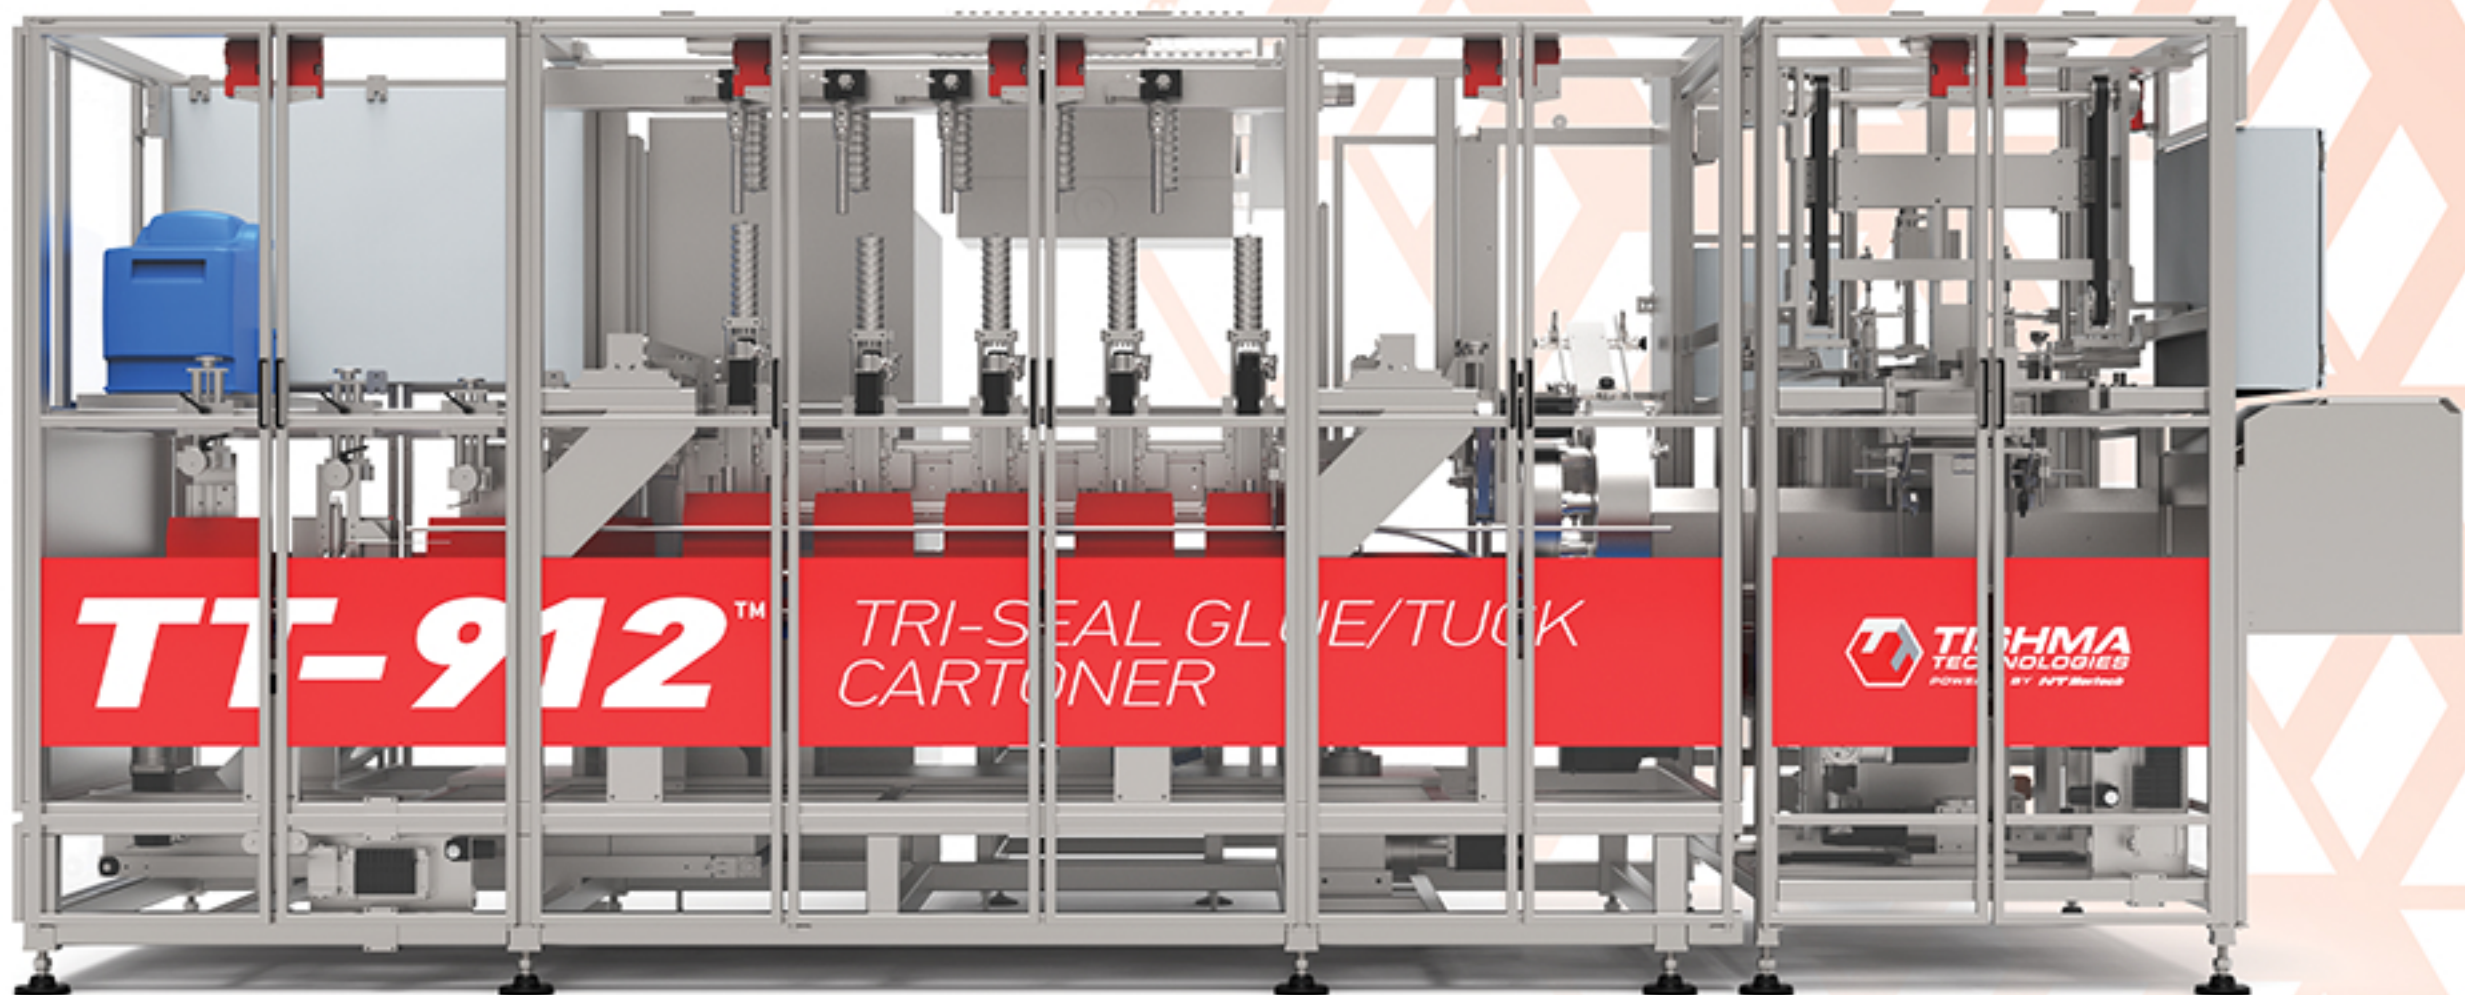

Automatic Tri-Seal and Flat-Blank Vertical Cartoner.

The TT-912 top load cartoning machine represents a new approach to automated flat blank cartoning.

The TT-912 series offers continuous motion, totally integrated systems, or modules featuring positive carton control and on-demand computer scale interfacing.

Welded tubular stainless steel construction, line shaft drives, and PLC controls lead to high efficiencies, less waste, more sanitary operations. Discover the new packaging and design approach to automated, totally controlled flat-blank and tri-seal cartoning.

TOP-LOAD CARTONER

QUICK CHANGEOVER

COMPACT FOOTPRINT

SPEED	Variable, up to 135 cartons/minute
MODE	Continuous or Intermittent Motion
CARTON FEED	Powered magazine with reciprocating feeder
CARTON FORMING	Overhead traveling mandrels or carton erector interface
CARTON SEALING	Hot melt glue, flame, hot-air, or tuck closing
CARTON CLOSING	Stationary and mechanical plows
